Professional Summary

Senior Solutions Developer with extensive expertise in leveraging advanced technologies like containerization and AWS Cloud. Corey excels in collaborative environments, driving innovation and achieving impactful results. Passionate about becoming a Data Scientist and AGI/ML expert, he combines his backend data engineering experience with full-stack cloud development to deliver scalable solutions.

Employment History

Leading EDJE Consultant / Senior Solutions Developer | Crown Equipment

Jul 2021 – Oct 2024
Lead knowledge transfer and skill uplift for new team members, enhancing delivery processes.
Collaborating with architects to break down Monolithic applications into domains, microservices, APIs, and event processing to be more manageable and scalable.
Collaborate with Product Owners and Design Leads to implement UI/UX best practices.
Utilize AWS certifications and IaC to develop secure, scalable infrastructure solutions.
Implementing QA via test pyramids, TDD and BDD frameworks, and automation.
Drive team maturity in Agile and Scrum practices, resulting in faster delivery, reduced costs, fostering knowledge sharing and collaboration.
Lead feature projects, document requirements, and guide team through technical solutions.
Mentor junior developers in Agile and SCRUM techniques, troubleshooting, and unit testing best practices.

Software Developer | Nationwide Insurance

Oct 2014 - May 2021
Design and developing BI and Big Data tools, enhancing sales and commission tracking.
Lead development teams, implementing best practices and integrating new methodologies such as Lean and Agile.
Automate deployment tasks with scripts, CI/CD Workflows, and webhooks reducing deployment time.
Utilize SQL and Teradata for data analysis, optimizing database performance and architecture.
Implement ETL processes and Data warehouse best practices.
